The maximum obligation of Transporter to deliver gas under this Service Agreement to or for Shipper, the designation of the points of delivery at which Transporter will deliver or cause gas to be delivered to or for Shipper, and the points of receipt at which Shipper will deliver or cause gas to be delivered, are specified in Appendix A, as the same may be amended from time to time by agreement between Shipper and Transporter, or in accordance with the rules and regulations of the Commission. RE: Amended and Restated Negotiated Rate Letter for Service Agreement No. 142020 Revision 7

Dear Lucy,

This amended and restated letter shall serve as an amendment to the FT-1 Service Agreement between Expand Energy Marketing LLC (formerly known as SWN Energy Services Company, LLC) (Shipper) and Millennium Pipeline Company, L.L.C. (Transporter or Millennium) designated as Transporter's Contract Number: 142020 Revision 7.

Rates and Other Charges: Shipper, aware of the availability of a maximum recourse rate, elects to pay a negotiated reservation charge of \$0.45/dth/day under Rate Schedule FT-1 of Transporter's Tariff, plus all applicable commodity charges, the FERC's annual charge adjustment, and all other surcharges in effect from time to time under Rate Schedule FT-1 of Transporter's Tariff, provided however, that all charges other than the reservation charge may not cumulatively exceed \$.0075/dth/day; provided however, if Transporter is required by law to collect surcharges in excess of \$.0075/dth/day, Transporter will apply a monthly credit equal to the aggregate excess surcharges in the preceding month on Shipper's monthly invoice and any credit provided for hereunder shall be refunded to Shipper within sixty (60) days of the expiration of the Agreement.

Subject to the remainder of this paragraph, the reservation charge specified above is applicable to services during the entire term of the Service Agreement, regardless of any otherwise applicable maximum recourse reservation rate. If at any point during the term of the Service Agreement, Transporter's maximum recourse rate is reduced below that rate set forth above, whether by virtue of a rate case under Section 4 of the Natural Gas Act or an action under Section 5 of the Natural Gas Act, Shipper may elect to convert the Service Agreement to a standard form agreement under Transporter's then-effective tariff at all applicable maximum recourse rates, and all other terms and conditions of the Service Agreement will be replaced as of the effective date of Service Agreement with the terms provided for under the standard form agreement found in Transporter's then-effective Tariff; provided however, that Shipper may not exercise its election hereunder with respect to any reduction of Transporter's maximum recourse reservation rate if Shipper has actively participated (as opposed to merely intervening or responding to discovery request) in the action under Section 5 of the NGA that gave rise to the reduction unless such participation by Shipper occurred after the seventh anniversary of the In-Service Date; provided further that Shipper may not exercise its election hereunder with respect to any reduction of Transporter's maximum recourse reservation rate arising from an action initiated by Shipper under Section 5 of the NGA until after the end of the initial term of the Service Agreement. The foregoing shall not affect Shipper's right to participate in an action under Section 5 of the NGA with respect to Millennium.

Retainage will also be assessed on the receipt volumes tendered for transportation by Shipper as provided for in Transporter's Tariff from time to time. However, at the end of each annual period under the term of the Service Agreement, Transporter will undertake the following calculations:

1. Transporter will calculate the average price for preceding two annual periods of natural gas based on the Gas Daily rate for Dominion South Point gas;
2. Transporter will determine the value of the gas provided by Shipper as retainage under Transporter's Tariff with respect to the Service Agreement by multiplying all retainage provided by Shipper in such two annual periods under the Service Agreement by the average price determined in accordance with paragraph 1 above;
3. Transporter will determine the value of gas that would have been provided by Shipper as retainage under Transporter's Tariff under this Agreement if Transporter's retainage percentage was 2% during such two annual periods and Shipper had transported the volumes of gas that it did under the Service Agreement during such two annual periods by multiplying Shipper's transported volumes during such two annual periods by .02 and further multiplying that product by the price of gas calculated under paragraph 2 above;
4. If the amount so calculated in paragraph 2 above is greater than the amount calculated in paragraph 3 above, then over the subsequent annual period Transporter will apply a monthly credit equal to such excess amount divided by 12 to the reservation charges on Shipper's monthly invoices under the Service Agreement, provided however, that the reduction in the reservation charge provided for in this subsection will never reduce the reservation charge under the Service Agreement below a rate of \$.30/dth/day.
5. Any credit provided for retainage shall be refunded to Shipper at the expiration or conversion of the Service Agreement within sixty (60) days of (A) the expiration or conversion of the Service Agreement or (B) the date on which Shipper's election to be subject to Transporter's maximum recourse rate becomes effective.

Notwithstanding Shipper's payment of the negotiated rates set forth herein, Shipper shall be eligible for any sharing with other shippers in any credits, refunds or other offsets provided under Transporter's Tariff for amounts collected by Transporter for scheduling penalties, imbalance charges, cash-outs and similar charges.

Applicability of Rates to Primary Receipt and Delivery Points:

The rates specified above are applicable to the primary receipt point of Stagecoach, with the right at any time to move all or any portion of that amount to any current and future point east of Stagecoach (collectively, the "East of Stagecoach Points"); provided that any election by Shipper to move to any East of Stagecoach Point following the commencement of transportation services to that point shall be subject to there being sufficient capacity at such point when the change is requested.

The rates specified above are applicable to the primary delivery point of Ramapo.

Applicability of Rates to Secondary Receipt and Delivery Points: The negotiated rates specified above are also applicable to receipts and deliveries at all current in-path secondary receipt and delivery points and the following receipt and delivery points: Receipts (East Pool) and Deliveries (All current and future points east of Ramapo) (each a "Qualifying Secondary Point"). If Shipper uses any points other than a Qualifying Secondary Point, then Shipper shall pay Millennium's applicable maximum tariff rates solely with respect to those volumes that are received at or delivered to a point that is not a qualifying Secondary Point. In addition, the segmentation of capacity by Shipper shall not result in a change in the rates specified above unless such segmentation results in Shipper's use of points other than its Primary Receipt Points or Qualifying Secondary Points.

Credit Support: For purposes of applying section 3.9(b) of the General Terms and Conditions of the Tariff, if Shipper or a Guarantor is rated by multiple agencies, the higher rating will apply.

If the above meets with your approval, please have this amended and restated letter executed by an authorized company representative of Expand Energy Marketing LLC and return to the Transporter by email to caroline_falls@tcenergy.com.

These terms are effective as of March 1, 2025.
